Education

University of Bath, United Kingdom

2024 – Present

MSc in Data Science

- GPA: 1st Grade
- Dissertation: Detection of Important Tokens in Chain of Thought Trajectories using Uncertainty Methods to Propose an Uncertainty-Based Compressor

Universidad Privada Boliviana, Bolivia

2014 – 2018

Bachelor of Science in Electronic and Telecommunication Engineering

- GPA: 83/100
- Thesis: Development of a LoRaWAN network for air quality monitoring in Cochabamba, Bolivia.

Work Experience

Data Analyst

Remote, Bolivia

BAMBOO TEC

Mar 2024 - Aug 2024

- Designed and implemented an interactive project management dashboard to transparently measure team performance and track task progress, resulting in a 75% reduction in daily meeting time and an 80% improvement in ticket documentation quality.
- Developed a machine learning algorithm to detect mineral deposits in Chuquisaca, Bolivia, leveraging multispectral satellite imagery and convolutional neural networks (CNNs) for geospatial feature extraction.

QA Automation Engineer

Remote

QA-CADEMY

Sep 2022 - Mar 2024

- Developed and maintained full-stack automation frameworks using Selenium, Robot Framework, and Playwright frameworks for web and mobile applications, achieving 100% regression test coverage and reducing manual testing overhead.
- Implemented automated scraping tasks to continuously monitor and validate data integrity between front-end interfaces and back-end databases on both web and mobile applications.
- Authored and executed SQL queries for data verification and validation ensuring 100% data integrity and accuracy during back-end testing.
- Applied modern software development practices, leveraging Git for collaborative version control, CI/CD pipelines for automated builds and testing, and Jira to support Agile sprint planning and execution.

Project Engineer

Cochabamba, Bolivia

WINAYTEC

Feb 2018 - Sep 2022

- Developed embedded firmware for Internet of Things devices (STM32, ESP32, CC1352), gaining a full-stack perspective on data generation, transmission, and validation from sensor level to dashboard.
- Built real-time dashboards using Streamlit and Datagrama, enabling immediate, data-driven decision-making across multiple Internet of Things projects.
- Created a Power BI dashboard for stock management, including data pipeline setup, inventory data modelling, and visualization design to support the commercial team in making informed decisions about audio-video inventory.

Skills

Programming Languages: Python, SQL, C/C++ (Embedded software).

Machine Learning and AI: TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV, Hugging Face Transformers.

Data Engineering and Analytics: Pandas, Numpy, Spark, data modelling.

Data Visualization: Matplotlib, Seaborn, Power BI, Streamlit.

Databases: MySQL, MongoDB.

Cloud Computing and Containerization: GCP, AWS, Docker

Automation and QA Testing: Selenium, Playwright, Robot framework.

Electronic Engineering: Embedded Software, Internet of Things, power electronics.

Collaboration and Project Management: Git, CI/CD, Agile, Jira, Notion.

Languages: Spanish (Native), English (Advanced)

Publications

Efficiency Evaluation Under Various Parameters in an Integrated Solar Photovoltaic Energy System with LiFePO₄ Cells Storage for High-Altitude Regions

R. Velarde Montecinos, *C. Salazar*

Presented at the International Workshop on Lithium, Industrial, Minerals and Energy, 2020

[IWLIME/2020](#) [↗](#)

IoT Capacity Building in Bolivia: Learnings from a Flipped and Hands-On Short Course on LoRaWAN

G. A. Siles, S. Fuentes, *C. Salazar*

Presented at the 2025 IEEE Engineering Education World Conference (EDUNINE), Montevideo, Uruguay, 2025

[10.1109/EDUNINE62377.2025.10981365](#) [↗](#)

Awards and Recognitions

Plurinational Award for Science, Technology, and Innovation 2023

Awarded First Place in Category A: Excellence in Science in the field of Telecommunications, Information and Communication Technologies. The recognition was granted by the Ministry of Development Planning and the Ministry of Science and Technology of the Plurinational State of Bolivia for the Comprehensive IoT Project with Meteorological Sensors and LoRaWAN Technology: Implementation, Testing, and Training.

Extension Courses

Quality Assurance Test Automation Training Certificate QA-CADEMY	2023
Data Science Bootcamp MOJIX ENGINEERING INC	2022
Big Data and Data Analysis Diploma UNIVERSIDAD PRIVADA BOLIVIANA	2021
